

5P'S NOTEBOOK

P1: Prep Your People

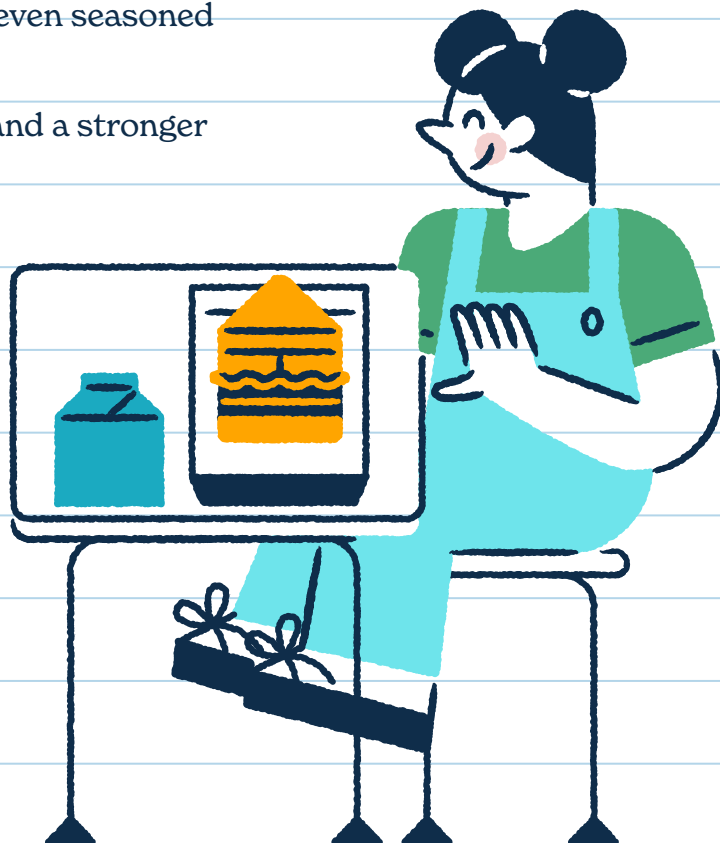

*Ensure your teams are trained, prepared, and equipped
with the tools they need to handle their tasks every
day with efficiency and confidence.*

BACK-TO-SCHOOL RULES • 2 SHEETS

Why It Matters

Feeding students takes a team effort and the start of the school year sets the tone. When everyone's trained and equipped from day one, operations run smoothly and students get served quickly. But when you're juggling paper logs, multiple systems, and outdated tools, even seasoned staff members can struggle to keep up.

Getting ahead now means less stress later and a stronger school year.

Best Practices to Prep Your People

- ✓ **Digitize Production Records:** Replace paper forms and spreadsheets with a centralized, digital system that simplifies record keeping.
- ✓ **Auto-Track Compliance Data:** Let technology do the heavy lifting—track temperatures, portions, and allergens automatically.
- ✓ **Eliminate Handwritten Logs:** Cut down on manual work and prep time with a platform that keeps your data clean and audit ready.
- ✓ **Train Teams Early and Often:** Prep staff on their schedule with on-demand courses for onboarding, refreshers, and role-specific training.

How the LINQ School Nutrition Suite Helps

Digitize Production Records

LINQ's production records are fully digital, intuitive, and integrated with menu planning, inventory, and POS. Staff can log meals, substitutions, and waste in minutes—not hours. Districts report cutting recordkeeping time by as much as 75%.

Auto-Track Compliance Data

LINQ captures temperature readings, portion sizes, allergens, and reimbursable meal compliance in real time. Visual red/green indicators help staff adjust meals on the fly, reducing errors and ensuring USDA compliance daily.

Eliminate Handwritten Logs

LINQ removes the need for paper-based systems with centralized digital records and instant syncing across your back of house tools. Audit prep is simplified, and records stay complete, clean, and easy to retrieve.

Train Your Team Early and Often

LINQ provides on-demand training modules and role-specific certifications accessible directly in the platform. From onboarding new hires to refreshing experienced staff, your team can build confidence and proficiency.

**Start the year ahead. With LINQ,
your people are ready on day one.**

Because when your team spends less
time chasing paper and more time
feeding students, everyone wins.

*Ready to start the year strong?
Help your teams prepare!*
